

▶ Berlitz Virtual Classroom

No Barriers, No Boundaries, No Excuses.

**Traditional interaction
with new technology**

Traditional interaction with new technology

Unlike other computer-based learning programs, Berlitz Virtual Classroom® features live instruction. Wearing headsets and microphones, participants interact with each other and the highly trained, native-fluent Berlitz instructor online just as they do in a traditional classroom setting. They practice conversation in realistic situations. Supportive instructors provide feedback and personal attention to build each participant's skills and confidence. The online format is easy to use. It also allows participants to record sessions and play them back for review.

Flexible options to meet your requirements

Berlitz Virtual Classroom is available for beginners through advanced learners. Programs include:

- **Private online learning** for maximum flexibility in content, vocabulary and scheduling. One-on-one instruction allows the participant to learn at his or her own pace.
- **Group Instruction:** join a small interactive online group. Choose from many languages, topics and start dates (see page 2/3)
- **Corporate group instruction** provides the same dynamic classroom interaction as traditional instruction. Sessions meet at regularly scheduled times. Small groups allow personalized attention. Content can be customized to meet your organization's goals.

Berlitz Virtual Classroom is ideal for:

- Employees in different geographic areas who share similar language goals
- Employees in remote locations
- Professionals who travel frequently
- Professionals who prefer to learn in the comfort of their own home or office
